

Hex Factor - Contestant Guide

Before Doomsday

By 1st May 2026, you must have supplied the team with the following information. If we do not receive this info, we cannot guarantee your technical requirements.

1. Your Name (as it will appear on the Hex Factor voting coffin)
2. Music - what music/sound requirements do you have? (Please supply sound files in MP3 format)
3. Lighting - what are your lighting requirements? (Note the Hex Factor uses a simple LED lighting rig for a general stage wash.)
4. Props - what props are you bringing? (There is limited space in the wings for storage, so your act must be as self-contained as possible, and you will have no more than three minutes to set up and tear down your act.)

At Doomsday

At Doomsday, expect to attend a competitor briefing at approximately 18.00 on Friday.

On Saturday, you must report to the tech desk during the judges' discussion of the previous act. You should be ready to set up immediately the stage becomes available.

Remember, you have a maximum of three minutes to set up and three minutes to tear down following the judges' comments.

IMPORTANT - the ten-minute rule!

- Your Hex Factor act cannot exceed 10 minutes
- A green light will remain on throughout your act
- This will change to a red warning light at 10 minutes
- All lights and sound will cut at 12 mins, no exceptions, you will be left in the dark!

Following the voting, the winner will be announced later on in the bar.

Good luck!
